INSTRUCTION MANUAL
RUNNING STRIP CONTROLLER

TECHNICAL DATA

SKU	23610
BATTERY	A27 12V (not included)

02 YEAR WARRANTY*

INTRODUCTION AND WARRANTY

Thank you for selecting and buying V-TAC product. V-TAC will serve you the best. Please read these instructions carefully before starting the installation and keep this manual handy for future reference. If you have any another query, please contact our dealer or local vendor from whom you have purchased the product. They are trained and ready to serve you at the best. The warranty is valid for 2 years from the date of purchase. The warranty does not apply to damage caused by incorrect installation or abnormal wear and tear. The company gives no warranty against damage to any surface due to incorrect removal and installation of the product. The products are suitable for 10-12 Hours Daily operation. Usage of product for 24 Hours a day would void the warranty. This product is warranted for manufacturing defects only.a

WARNING

- Please make sure to turn off the power before starting the installation.
- Installation must be performed by a qualified electrician.
- For indoor use only.

Caution, risk of electric shock.

This marking indicates that this product should not be disposed of with other household wastes.

REMOTE CONTROL SETUP

Step 1: Install the Battery

- Gently pry off the middle ON/OFF button cover on the remote control.
- Insert the correct type of battery (e.g., A27 12V, battery not included) into the compartment, ensuring correct polarity.
- Snap the ON/OFF button cover back into place.

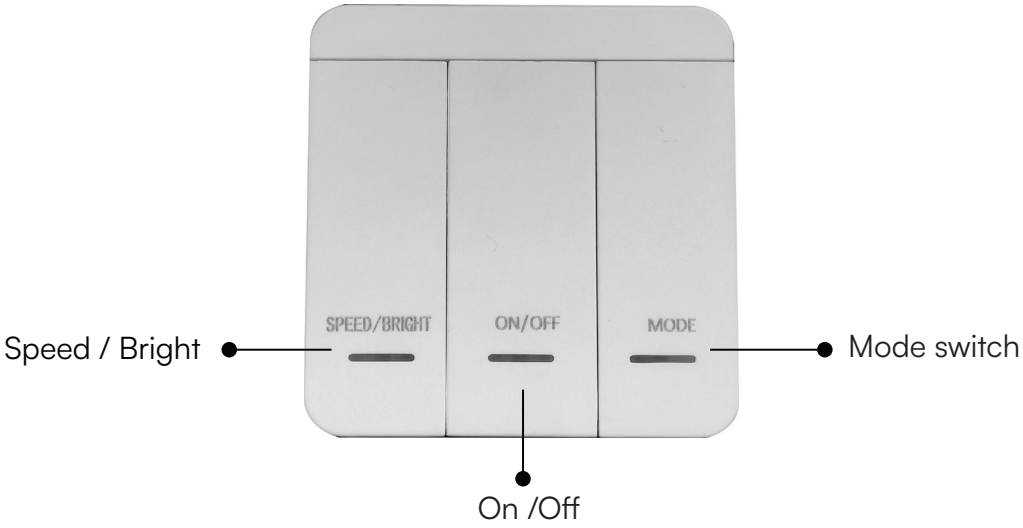

Step 2: Mount the Remote

- Peel the backing from the included double-sided adhesive pad.
- Firmly press the adhesive onto the back of the remote control.
- Clean the desired wall surface and press the remote firmly into place for easy access.

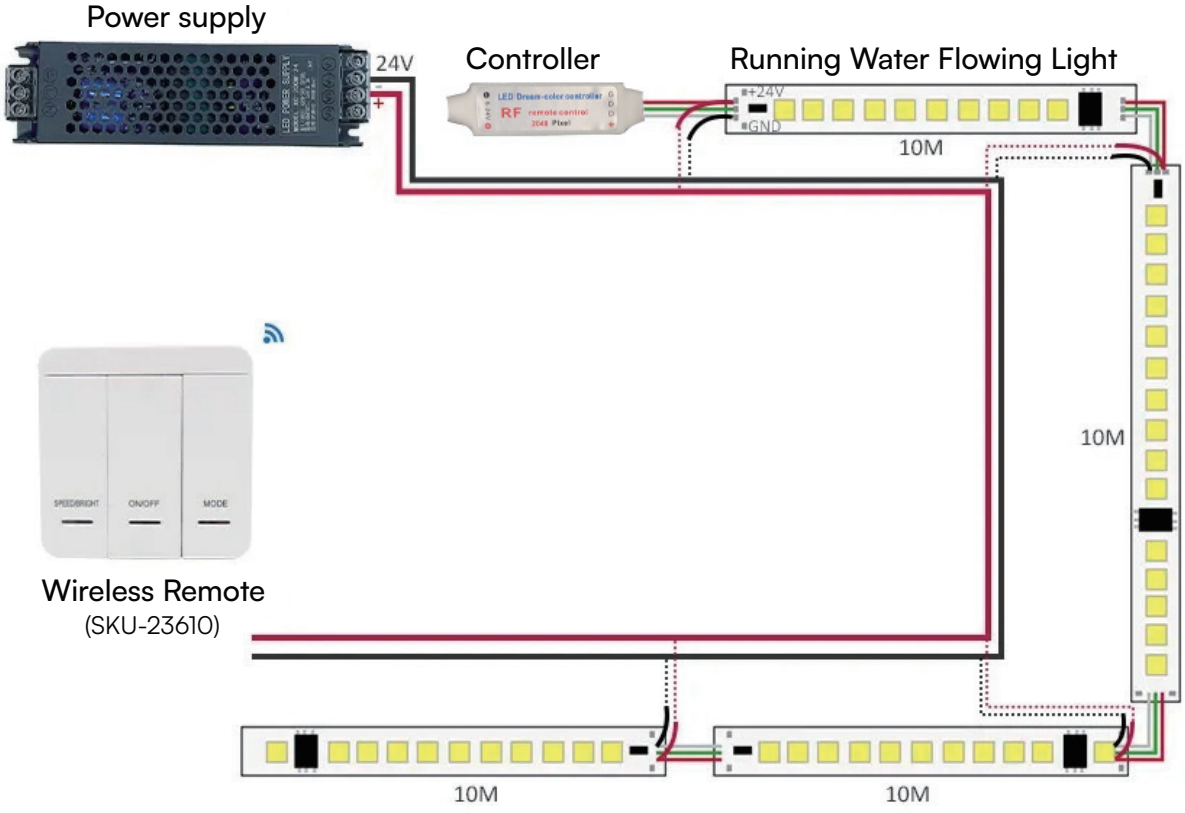

SYSTEM CONFIGURATION (SETTING PIXEL COUNT)

To ensure accurate operation of visual effects, the controller must be configured with the total length of the connected LED strips.

- Turn the main power supply OFF, wait 5 seconds, and turn it ON again.
- Within 5 seconds of power-up, press and hold the "**MODE**" button for 5 seconds. The beginning of the LED strip will light up, indicating it's in configuration mode.
- Repeatedly press the "**SPEED/BRIGHT**" button. Each press will "add pixels," lighting up more of the strip.
- Continue pressing until the entire strips is fully lit.

CONTROLLER-TO-LED STRIP CONNECTION OVERVIEW

OPERATING LIGHTS

- **Turn ON/OFF:** Press the middle "ON/OFF" button.
- **Change Mode:** Press the "MODE" button to cycle through the 10 different pre-programmed flowing effects.
- **Adjust Speed:** While the lights are ON, press the "SPEED/BRIGHT" button to cycle through different speed levels for the current effect.
- **Adjust Brightness:** While the lights are OFF, press the "SPEED/BRIGHT" button to set the desired brightness level. Press "ON/OFF" to turn the lights on at the newly selected brightness.

RESET TO FACTORY DEFAULTS

If the controller does not respond correctly or behaves unexpectedly, perform a factory reset to restore its default operating settings.

- While the lights are **ON**, press and hold the "**MODE**" and "**SPEED/BRIGHT**" buttons simultaneously for a few seconds. This restores the controller to its original factory settings.

Note: After performing a factory reset, the controller will revert to its default settings. Need to must reconfigure the pixel parameters as outlined in **System Configuration (Setting Pixel Counter)** to ensure proper lighting effects.

REMOTE CONTROL SAFETY INSTRUCTIONS

- Before using this product, make sure that all parts are configured correctly according to the instructions in the attached instruction.
- The product should not be used by persons under 5 years of age without supervision by a parent or guardian.
- Ensure that the power batteries are configured correctly and have the appropriate parameters as specified by the manufacturer.
